

EH4/w & EH3/w External Camera Housings

- ▶ Aluminium construction
- ▶ Integral wiper
- ▶ Heater / demister
- ▶ Stainless steel fixings
- ▶ Manufactured to weatherproof standard BS.EN60529 Level IP66
- ▶ Suitable for analogue and IP cameras
- ▶ Adjustable camera mount
- ▶ Multiple cable entry positions
- ▶ Integrates with our WA series washers

The EH4/w & EH3/w camera housings have been designed for fixed camera applications, providing a safe environment for analogue and IP cameras alike.

Widely used on high-security facility perimeters including CNI, prisons, secure health facilities and transport hubs the EH4/w is a compact camera housing that is recognisable around the world as a cornerstone of CCTV installations.

The EH3/w was designed specifically for larger camera assemblies or those that utilise zoom lenses.

Environmental Protection

The camera housings is manufactured from aluminium with a high-quality powder-coat finish. All external fixings are stainless steel. The white gloss sunshield not only protects the camera and lens from the effects of direct sunlight but also deflects solar radiation.

The housing is sealed to an IP66 standard making, keeping the camera assembly safe from the worst of the weather.

Integral Wiper

The EH4/w & EH3/w come complete with a self-parking wiper. This feature is essential where dirt contaminants can degrade the picture quality. The wiper is even more important in applications where video motion detection is employed as dirt can often reduce the accuracy of the VMD software. The WA series washers can add an extra cleaning facility if required on more challenging sites.

Screen Heater / Demister

All EH4/w & EH3/w come complete with a heater/demister. This feature is especially useful in the spring and autumn where the day / night temperature difference is at its largest. The heater demister creates a warm airflow on the housing glass so preventing moisture build-up and keeping the camera image clear.
